About This Game

Discover a new, mysterious and unusual world. Pass the tests, open the secrets of the main character and slightly open the veil of secrecy, as well as find the answer to the question - "Who am I? And why am I here? ".

Analemma is a philosophical puzzle with a first-person view, in which you have to solve various tests and soon get answers to the main character's questions - "Who am I?" And why am I here? ". First of all, the game will give you beautiful locations, pleasant music, and entertaining gameplay, which will brighten up a few hours and immerse you in the atmosphere of travel and other worlds.

You will find yourself in a strange place, completely empty, but you should activate the mechanism, and then you'll see how everything changes. Your main task is to reach the end and understand what happened to the main character and why he is here?

Features of the game:

- Overcome many interesting levels.

-
- Manipulate the environment, change the reality to find a way out.
 - Look for Easter Eggs, collect achievements.
 - Beautiful and relaxing music.
 - Unique locations.

I never get sick of this game. You can get in, get out and have a full game in no time.
I just wish multiplayer support was better. Never been able to play against a person, yet.

I have experienced some crashes and lock ups with the game, but that may just be my laptop.

This game represents excellent value for money and makes a great gift.. Cyberpony is f*cking horrible. F*** that sh*t.. Amazingly engaging platformer! The more you die, the more you want to come back and pass the level that made you feel like a little hopeless piece...

If you add the drive to find the coins as I did, you go to the next level of gollumness; My precious!!!!
My girlfriend already says I have a weird relationship with this game :P

Don't think a lot before buying this game, let your inner masochist come alive. Give it the time it needs and embrace the love for pain.

Awesome game.

. Krautscape is a racing game with cars that can float (you can't accelerate so you're not flying). All cars are identical and all tracks look mostly the same. The sky is filled with distracting "stuff" that's randomly generated. It's all very basic and the floating mechanic doesn't really make up for that. You're better off getting something like Dirt or Grid.. \u263a Interesting mix of tower defence and puzzle mechanics.

\u263a Cute and colourful art style suitable for any age.

\u263a Easy to learn and play but still challenging to perfect levels.

\u2639 Limited replayability.

\u2639 Starts off very easy.

Go Home Dinosaurs! is a lovely game that I can heartily recommend for fans of tower defence games, regardless of age. You take the role of a lil' gopher as he coordinates his friends to defend their BBQ from hungry dinosaurs. Tower placement is enhanced as each tower has a specific shape and size, requiring you to plan ahead and maximise space with optimal positioning. As the dinosaurs head towards your delicious steaks (or carrots, if you'd prefer!) you're tasked with collecting additional coconuts to create more towers or can even provide support and get involved in the defence itself.

A little undercooked but still tasty and filling.. Really enjoyed this game, it always added new abilities at the right time to keep it fresh. Visuals a nice, the music is nice; just a nice relaxing game. Some nice puzzles as well with hidden collectables to keep an eye out for. I would easily recommend.. Great bonus tracks!

This changed me. Hello ? Anybody ? Helllllloooooo ? . A short, sweet, thought provoking little VN. Mostly a kinetic novel, as there's only one choice, which only affects a scene or two.

Not too often you see sensitive games dealing with death and depression that could also be described as 'cute'.. Crashes every time I play multiplayer.

Singleplayer is way too easy.. I grew up on games like Kings Quest and have always enjoyed a good point and click game. It seems that quite a few of these types of games have been coming out recently and a lot of them are high quality. If you have played Primordia, Unforeseen Incidents, and other newer offerings to this genre this game continues the trend of excellency.

The important things you want to know

-The puzzles are great. No ridiculous logic leaps needed and you are rewarded for having a keen eye to detail. Very thoughtful puzzle design.

-The voice acting is excellent. The characters all have a unique personality which helps to create a world that is interesting to explore. I haven't found myself skipping through conversations and this also comes back to the previous point.

-The animations are just right. Really fits the genre quite well and hits a bit of nostalgia for me.

If you're looking for a fun point and click game, and one that doesn't allow you to get frustrated I highly recommend Whispers of a Machine. I've been playing point and click adventure games for years and this one has already slotted itself in as a favorite of mine.. wow, really trippy and relaxing :)

the description of the game sounds stupid, but when you play it... its fun!

not sure how much time ill spend playing it, but for less than 5\$ its definitely worth it!. This documentary is 2 hours and 7ish minutes long, and it actually kept me intreagued through the whole thing, extremely facinating history.. Naoto for best waifu of all time

Update 3.7 - NEW MAP!:

It's time for another update for Bloons TD 5! Let's take a look at what's new:

New Content. **USA land forces in Strategic Mind: The Pacific:**

The key feature of the US land forces is better equipment and availability of self-propelled units of all types. This proved to be a solid advantage over arguably less technologically advanced Imperial Japanese Army.

And even though it was not a trivial task to transport and to land mechanized units on tiny islands amidst the Pacific Ocean each of those machines pushed the odds in the US favor.

- Self-propelled anti-aircraft gun: **M15 Halftrack**
- Self-propelled artillery: **M7 “Priest”**
- Tank destroyer: **M10 “Wolverine”**
- Tanks: Light tank **M3 Stuart** and Medium tank **M4A1 Sherman**

Make sure to let us know your thoughts on the subject in the comments below.. **UBOAT 2019 TRAILER:**

Happy Halloween everyone!. **Announcing Zoom Player v9.4.1:**

Legend :

"*" = New

"+" = Change

"-" = Fix

--- What's new in Zoom Player v9.4.1:

* Clicking the selected item count checkbox in the playlist, file browsing and media library fullscreen navigation interfaces now acts as a shortcut to the extended file selection page.

* New scenecut editor "Pause Playback" entry type.

* Introduced stricter sub-type format checking to prevent errors.

+ Auto-Showing the control bar when the mouse cursor is moved to the top or bottom of the screen (selectable in the options) now triggers when the mouse cursor is up to 4 pixels away from the top/bottom

instead of the just the top/bottom pixel.

- Trying to play all files in a directory did not ignore unknown file extensions, adding them to the playlist instead.

- With the "Auto-Size User Interface to maintain Video Aspect Ratio" setting enabled, triggering an action OSD (like "Pause") would cause the window to auto-resize.

- A bad sub-type in the H.264 video decoder smart play profile could have caused issues under certain conditions.

- Selecting "all matching multi-part files" from fullscreen navigation interfaces could select non-file entries such as "Previous Directory" and others.

* The Complete Change list history can be found on-line at:
